CRA Holds 200th GlobalDairyTrade (GDT) Trading Event

GDT, an electronic trading platform that was designed and developed by CRA, recently held their 200th Trading Event. As independent Trading Manager, CRA manages GDT's twice-monthly multi-seller, multi-buyer auctions, which involve hundreds of participants around the world. GDT generates benchmark prices that are used throughout the international dairy industry, and futures and financial contracts are traded based on the prices and outcomes generated by the platform. Since 2008, six million metric tons and over \$20 billion of internationally traded dairy products have been sold on this growing marketplace.

About CRA's Auctions & Competitive Bidding Practice

For two decades, CRA has designed, conducted, and monitored high-stakes auctions and other competitive transaction mechanisms in many industries and in more than a dozen countries. Whether you want to maximize the value of your assets, minimize your procurement costs, or achieve other objectives, you'll find the expertise, experience, reputation, and support you need at CRA.
